## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-21, drawn to compounds of formula I, wherein V is CH<sub>2</sub> and R1 is option (1).

Group II, claim(s) 1-21, drawn to compounds of formula I, wherein V is O and R1 is option (1).

Group III, claim(s) 1-21, drawn to compounds of formula I, wherein V is S and R1 is option (1).

Group IV, claim(s) 1-21, drawn to compounds of formula I, wherein V is CH<sub>2</sub> and R1 is option (2).

Group V, claim(s) 1-21, drawn to compounds of formula I, wherein V is O and R1 is option (2).

Group VI, claim(s) 1-21, drawn to compounds of formula I, wherein V is S and R1 is option (2).

Group VII, claim(s) 1-21, drawn to compounds of formula I, wherein V is CH<sub>2</sub> and R1 is option (3).

Group VIII, claim(s) 1-21, drawn to compounds of formula I, wherein V is O and R1 is option (3).

Group IX, claim(s) 1-21, drawn to compounds of formula I, wherein V is S and R1 is option (3).

Group X, claim(s) 1-21, drawn to compounds of formula I, wherein V is CH<sub>2</sub> and R1 is option (4).

Group XI, claim(s) 1-21, drawn to compounds of formula I, wherein V is O and R1 is option (4).

Group XII, claim(s) 1-21, drawn to compounds of formula I, wherein V is S and R1 is option (4).

Art Unit: 1626

PCT Rule 13.1 states that the international application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept (requirement of unity of invention).

PCT Rule 13.2 state that unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features.

Annex. B, Part 1(b), provides that "special technical features" mean those technical features, which, as a whole, define a contribution over the prior art.

Annex B, Part I(e), provides combinations of different categories of claims and states:

"The method for determining unity of invention under Rule 13 shall be construed as permitting, in particular, the inclusion of any one of the following combinations of claims of different categories in the same international application:

(I) in addition to an independent claim for a given product, an independent claim for a process specially adapted for the manufacture of the said product, and an independent claim for a use of the said product, or

(II) in addition to an independent claim for a given process, an independent claim for an apparatus or means specifically designed for carrying out the said process, or

(III) in addition to an independent claim for a given product, an independent claim for a process specially adapted for the manufacture of the said product, and an independent claim for an apparatus or means specifically designed for carrying out the said process..."

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 C.F.R. 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

The inventions do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding technical features that defines a contribution over the prior art. The compounds claimed contain a phenyloxy moiety which can be taken as a whole as a technical feature. This feature, however, is not a 'special technical feature' as per the PCT rules because the feature does not provide a contribution over the art, as it was known in the art prior to the filing of the instant application. Accordingly, the unity of invention is considered to be lacking and restriction of the invention in accordance with the rules of unity of invention is considered to be proper.

Art Unit: 1626

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
